Whether they are the next great leaders or a quiet introvert — they are interesting. I enjoy getting to know individuals and find myself asking far more questions than I'm usually comfortable with. I also have a tendency to be a bit of a talker. All of that is what led me to create this website, The Terrifying Conversationalist. My aim is to help people learn how to have more interesting conversations and develop better habits around conversation. I also encourage everyone to write down their goals and dreams in this website. One last thing — it will be up for a short amount of time. This website will be back with you soon! Thanks for reading! If you have any questions about the website, please feel free to send me a tweet or email me. Stephen Jones ***Loud Mouth Marketing Founder P.S. — If you have any suggestions or feedback, please leave it in the comments below.Dagmar Arnau Dagmar Arnau (born 16 May 1942) is a German former footballer who played as a defender. She is a UEFA Women's Cup champion. Honours UEFA Women's Cup winner: 1977, 1979 References External links Category:1942 births Category:Living people Category:German women's footballers Category:SC 07 Bad Neuenahr players Category:Women's association football defenders Category:UEFA Women's Championship-winning players Category:Frauen-Bundesliga playersQ: Is it possible to store a variable within a file and use it later? I have a training file (data.txt) where I store some variable names for use in several other files. I would like to create a file with the same name as the training data file and use it to create a new variable. However, to be able to do this, I would first have to check if the new variable already exists. This is what I've done so far: for (i in 1:31) { tmp.var = c(i) assign(tmp.var, c(1:
