What is this app? This app is the free version of FileFinder Enterprise. By using this app you can recover your encryption keys and decrypt your data. It's easy and free! What is FileFinder Enterprise? FileFinder Enterprise is a product of a European company who has been distributing data

---

recovery software for many years. With this software, you can easily recover your files and recover all data from almost any hard drive encryption that has a partition table. You can recover all types of file systems, including NTFS, HFS+, FAT32, Linux, and more. It is compatible with most types of hard drives and solid state drives. It is free, easy, and it works! Who is this app for? FileFinder Enterprise is for anyone who needs to recover data and encryption keys from any kind of hard drive encryption that has a partition table. Features:

- Recover all types of file systems, including NTFS, HFS+, FAT32, Linux, and more.
- Recover your files from external hard drives, SD cards, USB sticks, flash drives, external hard drives, and portable hard drives.
- Recover your files from hard drives that don't have a partition table.
- Recover your files from truecrypt volumes.
- Recover your files from BitLocker (Microsoft Encryption) volumes and BitLocker
