I only know that all files in that folder should be in languages, but i can not find the same file in the.exe or the wine "root" directory. Author Windows 7, English and more. Nice . Hello, I have a language problem in my game. I make it Turkish and I just see "-----" letters, and later, I make it English and the game be Russian. Why? How can I fix the problem? in steam right click the game and choose properties, then languages tab, and then choose english. I hope you can help. But this game has no option for Turkish : x The file manager is not an option to select language, it is just showing a blinking cursor after I selected it. I have tried switching the language to English, but on every restart I get the same problem. Delete your . Hi All, recently i start to play this old game again. but as i switch between languages, i accidentally deleted \loc\eng, the language. Please give me your skills help, I know that all files in that folder should be in languages, but i can not find the same file in the.exe or the wine "root" directory.
