There are no available data on the concentration of estrogen receptors and binding characteristics of tamoxifen in human endometrium. In the present study we have examined the concentration of estrogen receptors in endometrium using [3H]estradiol-17 beta and [3H]tamoxifen and the binding characteristics of [3H]tamoxifen to endometrial tissue. Using these methods we found that the mean concentration of estrogen receptors in endometrial tissue was 12.2 fmol/mg DNA (range 3.9-32.0) and that the mean binding capacity of [3H]tamoxifen was 0.55 pmol/g (range 0.10-1.25) at 0.01 nM [3H]tamoxifen. In 7 cases of endometrial cancer, the concentration of estrogen receptors was 6.6 fmol/mg DNA and the binding capacity of [3H]tamoxifen was 0.56 pmol/g. The binding capacity was not correlated to the expression of estrogen receptors and the binding characteristics of [3H]tamoxifen was not consistent with that of [3H]estradiol-17 beta in terms of Kd and Bmax values.Q: How to change tab icon position in tabs activity of Android using xml? I want to change the tab icon position from the left to the right side of the tab. How can I do it. I tried many solutions but did not get the result. If anyone knows then pls help me. Here is my code: @color/colorPrimary @color/colorPrimaryDark @color/colorAccent
