**JCrackChat**

Simple, easy to use Client-Server application written in Java. It is easy to use, but still powerful enough to handle huge numbers of users. It also provides the ability to synchronize chat history with other devices and has a nice XML data saving mechanism.

---

JCrackChat Features: - Added a setting which allows you to set the maximum number of displayed channels.

- All chat messages are now compressed and stored locally, so that the data doesn't need to be sent to the server every time.
- Built in XML saving mechanism allows you to save the user information, chat history, etc.
- Now it's possible to change channel and switch between channels using the keyboard shortcuts 'n' and 'v'
- More settings available in the configuration panel.
- New highlighting and a Mac OS X like dock.
- The user has a 'menu' button at the bottom of the window. Click the 'menu' button and you can get access to the settings and the help.
- Configurable tooltip that show a message on each user when he joins a channel.
- Improved chat history.
- New 'history' button on the toolbar.
- Improved network API.
- New setting to use

---

the client in server mode. - New setting to hide the 'channel' window. - Show the chat window at the bottom of the screen. - Major bugs fixed and performance enhancements. - Now you can be the server and the client at the same time. - The 'close' button works better than before. - You can add nicknames to the users and save them into an XML file. - For example: '@User\_Gustav' and 'User\_Gustav' will be displayed as '@Gustav' - Added 'image' as a new option to the help setting. - Added setting to reset the mouse settings. - Improved chat history. - Fixed the bug that caused all channels to be displayed on startup. - Fixed the bug that caused the 'username' to be displayed on all messages. - Minor bugs fixed and performance enhancements. - Now it's possible to load the users, channel and the chat history from an XML

---

file. - You can use the CTRL+C (ctrl+v on windows) to copy the chat to the clipboard. - Minor bugs fixed and performance enhancements. - Now it's possible to hide the 'channel' window after a message 77a5ca646e

## JCrackChat Crack + Keygen For (LifeTime)

----- JCrackChat is a simple, easy to use Client-Server chat application written in Java that will help you stay in touch with your friends. The Client-Server architecture allows you to send and receive text messages without having to log on to the Internet. While JCrackChat can be used for Internet text communication, it is not meant for this purpose. Currently, JCrackChat has been tested in Internet Explorer 6, Internet Explorer 7, Firefox 1.5.0.8, Opera 9.0, Netscape 9.02, Safari 2.0.4, and Konqueror 3.5.6. Features:

----- Simple Interface  
JCrackChat is very simple to use. You have to input

---

your friends' name in the Client and click Start. JCrackChat will find your friends on the Internet and will allow you to send them a text message. Your friends will receive the text message, and they'll receive the text message right on their cell phone. There are various settings in the Client. You can change the following settings: Client Color: You can choose what color you want the text that you send to appear in. You can choose between these colors: Red, Green, Blue, Yellow, Magenta, Cyan, Orange, and Black. You can also set the background color to be Red, Green, Blue, Yellow, Magenta, Cyan, Orange, Black, White, Gray, or Gray Gradient. Font Size: You can choose what size of font you want to use. You can choose between these sizes: Small, Medium, Large, Extra Large, Extra Extra Large, and Extra Extra Extra

---

Large. Client Background: You can choose what color you want the background of the Client to be. You can choose between these colors: Red, Green, Blue, Yellow, Magenta, Cyan, Orange, Black, White, Gray, or Gray Gradient. Client Text: You can choose what text you want the Client to be. You can choose between these texts: SMS, MMS, Email, ICS, Google Talk, Facebook, Twitter, Skype, and BlackBerry Messenger. Client Notification: You can choose what type of notification you want the Client to be. You can choose between these notifications: Silent, Loud, and Vibrate. Client Alert: You can choose how you want the Client to alert you if you receive a text message. You can choose between these alerts:
