Audacity is a fast, free audio recording and editing program. Audacity 2.1.1 - Free Audio Programs. Audacity music recording and editing software. Audacity download for Windows 10, Windows 7, Windows 8, Windows XP Audacity music recording and editing software. Audacity is one of the most popular audio editors in the world. It is often used not only for home needs, but also in professional activities. The program allows you to edit and modify audio files, as well as to make certain manipulations with them. The editor's interface is very simple and easy to use. At the top is the "Stop" button, and on the right is the "Play" button. On the left side are buttons for navigating through the track. At the bottom there are two buttons: "Play/Pause" and "Stop". There is also a "Back" button that can be used to go back to the beginning of the track. At the top is the "Before" button, which opens the previous track, and at the bottom is the "After" button, which opens the next track. Next is track number. In the first track, which starts with zero, we see on the cover what the song is. The song title is written above the icon. By clicking on it, we see information about the track, as well as the artist, if listed. How and where to download the song for free? To download music, hover your cursor over the song title and press the right mouse button, hover over the "download" link and press the left mouse button. A save location window will appear (the highlighted file will be automatically selected), then click "Save". What is online listening and how does it work? Online listening refers to listening to music via a web browser. To do this, you need to download a player. On Google Play, this player is called Audio Recordings. It is easy to use, convenient, and free. It has everything you need, such as the ability to change the playback speed and even the size of the sound. On the playback page, you can click "Skip" or "Repeat" and listen to the song to the end. Or you can go to another page, where you can see a list of all the songs that are in the database. The player has a widget where you can see which song is currently playing.
