Nero WaveEditor is a high-quality, easy-to-use and fast waveform editor for Windows. It features powerful audio editing tools, powerful editing functions, high compatibility with all audio file formats, cutting tools, etc. In other words, it can be used to modify and organize your audio track. If you are a musician or you simply like to enhance your audio tracks as much as possible, then you might also appreciate the functions of Nero WaveEditor. You need to pay extra attention during installation, so as to disable all the third-party offers that come bundled within its setup file. The graphic interface of the application is highly intuitive so you can simply choose the audio track you want to edit, be it NWF (the app's native format), AC3, AIFF, MP3, WMA, FLAC, MP4, M4A, M4B, AAC, OGG or WAV. Once the track is loaded, you can select the segments you want to remove or copy to another location, as well as crop the song to the length you specify. Furthermore, you can rely on one of the many built-in tools to adjust the source file according to your preferences; more precisely, you can use the de-esser, the dynamic processor, the equalizer, the noise gate, pitch tuning, time correction or transposing utility. Nero WaveEditor also comes with a wide range of effects that can be used to enhance and optimize the overall sound of your track. Some of them come in handy for modifying the modulation, the loudness, the delay and distortion, while others can be used to process the chorus, the convolution or surround reverb and the voice modification. Additionally, another function of Nero WaveEditor is that it can record the sounds on your PC and overwrite or insert within the current track. Once you have performed all the chances you had in mind, you can export your file to a supported format, such as WAV, AIFF
