The application allows you to import or construct the 3D model from a 2D drawing or from 3D CAD data files and then add further 3D objects such as text, symbols, dimensions, surfaces, sections and more. A number of 3D modelling extensions are available for AutoCAD LT. In addition to Civil 3D, these include Structural 3D, MEP 3D, Structural Analysis, Survey 3D, Site 3D, and Soil 3D. From the menu, you can access a number of 2D tools such as the DRAW tool, the LINE tool and the RECTANGLE tool. The largest menu option available is the 3D MODELER tool, which is used to create 3D models and elements. When modelling, it is possible to create one or more groups for objects that you will then link together. To create the required 2D objects and import data, the user needs to apply the DRAW tool or a line drawing tool to the drawing area. Once the model

Support for the office suite Office 2010 has replaced its older counterparts like Word, Excel and Powerpoint with its own AutoCAD Product Key version, called AutoCAD 2010. In addition to the features in AutoCAD 2009, it adds among other things 3D modeling capabilities. Awards AutoCAD is widely regarded as one of the most complex CAD programs, and it is considered to be a leading product by industry analysts, with a current market share of 80–90% of the world's desktop CAD market. In 2007, AutoCAD was inducted into the Association for Computing Machinery's (ACM) Hall of Fame. The same year, AutoCAD received a "Commendation" from the Computing Research Association (CRA) for being "a significant research contribution to computer science, to science and technology, and to the profession of computer science." In 2008, AutoCAD received a Platinum Level Award from Gartner, for a combination of on-time and on-specification products, services and support over a three-year period. In 2009, AutoCAD was named as one of the top 50 Business Software Products of 2008 by the Software Design & Development magazine. In 2010, AutoCAD was ranked the best engineering software in the World, by a 2011 industry survey of 100 software designers and usability researchers. AutoCAD is a Gold level Winner of the CADWorx Design Award for Best Feature-Packed CAD/CAM/CAE Product in 2016. User-based categories If the user has Microsoft Windows 7 or later, he or she may also use the "Windows Aero" interface. It is essentially the same as Windows Vista Aero, but it is only available in the latest versions of AutoCAD and other applications.
