Share and copy to Clipboard more easily. You can now choose to share or copy designs with other users and undo the past sharing or copying. (video: 1:30 min.) Markups, Lines and Dimensions: Simplify measurements in more ways. You can now measure with horizontal or vertical dimensions. As you position a dimension to mark a specific distance, AutoCAD 2023 will not automatically adjust the dimension based on the viewing orientation. (video: 1:35 min.) You can now use a dimension to specify a depth. Mark up depth and use it in the same way that you use length. Measure between point A and point B. Choose the dimension at point B and choose the direction you want the dimension to be perpendicular to. (video: 1:25 min.) You can also include text labels in your drawings. And you can use dimensions to hold text labels as well as shapes and lines. (video: 2:10 min.) You can also create your own custom properties. Create and manipulate 3D objects: Create your own custom grips. Easily modify existing grips with a command. (video: 1:05 min.) View and edit your 3D objects. You can now customize the appearance of 3D objects. (video: 1:10 min.) Layer editing is now more powerful. Layer operations can now be combined. (video: 1:25 min.) Mark and Fill functions: Customize the palette and have them appear immediately. Easily add, remove and replace symbols in the drawing palette. (video: 1:30 min.) With the Paint From Layer command, you can select a symbol and fill that symbol from a different layer. Also, make your own custom palette for using on your drawing's palette panel. You can now select a variable color or gradient for a brush in your brush set. (video: 1:35 min.) Smooth curves now work with any object selected. (video: 1:10 min.)
