Comes with a clean and user-friendly interface Following a quick and uneventful installation, you come face to face with the splash window where you are prompted to either add a file or specify the path to the disc. The video starts playing automatically, so you will be happy to learn that you do not need further configuration or to worry about having the right pack of codecs installed on your PC. The application comes with a modern interface, most of which is dedicated to the video. Nevertheless, it would have been useful if the menu would auto-

In addition to the standard controls available with any application in this category, the program also packs Video Effect settings that enable you to adjust the brightness, hue, contrast, gamma and saturation of the videos that you are playing. It would have been nice if the app also included advanced features that permit you to synchronize the audio with video and subtitles for instance.
