What's New In?

FlatPlayer is an advanced, highly configurable and versatile media player for Windows. The program supports a wide range of media files, including image, video, audio, script and executable files. Important note: FlatPlayer is the only media player of its kind that features its own rendering engine that can handle files from all known formats, including MP3, MPEG, AVI, FLV, Real, WMV and more. FlatPlayer is built to play media files from any folders as well as from removable devices. FlatPlayer Features: See numerous properties about the playback, such as playback speed, playback time, playback mode, volume, mute, position, file name and more. Real-time playback speed control and settings. Playback of the selected clip using the default player. Playback of a selected clip using the specified player. Automatic scan and play of the selected files. Configure and customize settings for the media. Easy to use: drag-and-drop files to play them. Play audio files by pressing the play button. Use the program's built-in search functionality to find specific files. The program's filters allow you to choose the required format for a file, so that you can play only files that have the specified format. Import the properties for existing folders. Support for external flash cards and USB cameras. Partially transparent playback window. Automatic grouping of media. Supports various text and audio track formats. Import or export settings via various protocols. Support to play files from various media formats. Online help. Tons of advanced features: full featured tag editor, video editing, subtitle and image editor, dynamic playlist, dynamic volume, etc. The program includes all the most useful features for media players. Free registration is required for some extensions. The application requires Java Runtime Environment (JRE). Depending on the type of JRE installed in your system, you may require one of the following versions of the program: JRE 1.5.x for Windows XP x32 JRE 1.6.x for Windows Vista and Windows XP x64 JRE 1.6.x for Windows 7 x32 JRE 1.6.x for Windows 7 x64 Other requirements: Internet Explorer. The program requires Internet Explorer 5.

System Requirements:

Minimum: OS: Windows 7/Windows 8/Windows 8.1 Processor: AMD Ryzen 3 2.0GHz or equivalent Memory: 6GB RAM Graphics: NVIDIA GeForce GTX 760 4GB / AMD Radeon HD 7870 3GB or equivalent DirectX: Version 11 Network: Broadband Internet connection Storage: 27 GB available space Additional Notes: Notes: We recommend the following video cards and CPUs to experience 60fps on high settings with the game's settings at medium:
