## Photoshop CC 2015 Version 16

Founded in 2006 by a team of artists, designers, and entrepreneurs, Grayscale Investments, based in New York, is known for being the first and largest publicly traded platform for the tokenization of assets. After issuing the world's first standard for compliant tokens backed by fiat (i.e. Physical Gold and Silver) Grayscale has now ventured into the stablecoin space with the vision to create the most reliable, audited, and compliant digital dollar. After a year and a half of development, Grayscale has announced a new partnership with the Gemini Trust Co. to issue the first in a growing list of USD-collateralized stablecoins. Grayscale's Tokens The launch of Grayscale's GUSD stablecoin allows U.S. customers to purchase the GUSD stablecoin in a one-to-one conversion with U.S. Dollars without any fees for conversion or settlement. Purchases will be settled in the near future to the Gemini Dollar (GUSD) and will be brought back to physical dollars (GUSD) in 30 days once the settlement is complete. Similar to other stablecoins, GUSD balances are tracked against the U.S. Dollar by backing the GUSD token with a one-to-one ratio of gold or silver in its custody. Its GRC token acts as a fuel for its revenue generating activities. It will be sold to investors as a means to support the GUSD token, engage the community and make campaign contributions. Through this token sale, Grayscale plans to grow its community and create and support user-generated content such as educational content and media. Among the benefits, such a decentralized stablecoin, tokenized and traded as a USD-backed security, would allow users to "create value from assets without having to actively trade in the open market." Gemini's Vision Grayscale's latest endeavor with Gemini is the first of many. Other projects are in the works to be launched, with plans to list dozens more tokens over the next year. In fact, several of the upcoming stablecoin projects have already announced "milestones" to be met. The partnership with Grayscale to launch Gemini's stablecoin is Gemini's first foray into the stablecoin space. Launching a new trading platform is only half the battle. The second half is really the application of

The Pen Tool, accessed by the Pen icon, is a scratchboard-like feature that lets you stroke a path around objects and shapes in your image and then fills them with different color, textures, or patterns. The Path Brush, accessed by the Paint Bucket icon, helps you create vector-style paths. You can then use different color, textures, and patterns to decorate those paths. A bezier path can be drawn in Photoshop by using the Pen Tool. With the Pen Tool selected, hold down the Spacebar to make the mouse pointer a white circle instead of a crosshair. Click and hold where you want the path to begin and then drag to draw it. Looking for a fun and easy way to create professional-looking background overlays for your images?
